

The TTC team have been trying out ways to reduce our plastic use. In aid of Plastic Free July, here are some tips we've been following.

Plastic wrap
Swap cling film for eco-friendly alternatives like beeswax wraps or silicone bowl covers.

Find alternative toiletries
Switching to soap and shampoo bars are some of the easiest swaps you can make.

Loose produce
Eliminate plastic wrap, instead opt for cloth, mesh or netted bags.

Recycling habits
Assess what you're putting in the bin. To make conscious decisions, swap to eco-friendly alternatives.

Avoid plastic straws
One of the top four plastics to avoid, skip the straw or consider a sustainable alternative.

Eat out, not in
Takeaways can come in plastic tubs and bags. Eating out reduces unnecessary packaging.

Shopping bags
Try keeping your reusable bags next to the door or in your car so you don't forget them.

Educate yourself
Education about plastic raises awareness about the issue and helps change consumer habits.

TTC reusable bottles
Have a reusable bottle for water. Our team has branded TTC ones to encourage us not to buy plastic.

Local independent businesses
Buying local reduces plastic packaging and transport emissions.

Contactless business cards
We're trialling bamboo contactless business cards which are 100% plastic free.
